*Illuminates Red when connected to AC Power.
A. Charging Mount
B. Base
C. Post
D. Micro USB (2m)
E. Cushion Crown
F. Pem Cap / Camera Mount*
G. Wood Screws (2)**

*Optional for Camera Mount (See page 14)
**Optional for table mount (see page 12)
A. Flip the Charging Mount upside down and insert the cushion crown into the bottom of the Charging Mount.
B. Insert the post into the bottom of the Charging Mount.
C. Turn the washer to the right until it is locked in place.
Step 1: Insert Micro USB from under the base.
Step 2: Remove Micro USB cover.
Step 3: Insert Micro USB connector into port and fit usb cable into the cord keeper.
Step 4: Leave enough slack to allow freedom of movement. Place cover.
Insert the post into the top of the base lining up the marker on the post to the unlock icon. Push down and turn the post towards the lock icon until you hear a click.
1. To unlock, find the small latch on the bottom of the base.
2. Pull the latch back and turn the post clockwise aligning the marker with the unlock icon.
When charging the scanner, make sure the charging pins on the stand and the scanner make contact with each other and the red Light on the stand is illuminated.

“Beep Beep”*
4-6 inches
(10 - 15 cm)
Two keyholes are provided on the Charging Stand Base for an optional installation on a wooden surface using the included screws (quantity 2) and Drill Template.

1. Place the Charging Stand on the Drill Template and situate these onto the desired location of your surface. Rotate the Stand so that it aligns with the solid Notch (not the dotted Notch) on the Template.
2. Rotate the Stand/Template combination so the Socket Mobile logo faces in the direction you want the scanner to face.
3. Tape the Template to the surface and remove the Stand.
4. Drill two \( \frac{3}{32} \)” holes through the drill marks on the Template.
5. Tighten the two screws with about \( \frac{1}{4} \)” of the screw head exposed.
6. Place the Stand on the template aligned with the dotted Notch.
7. You can now remove (tear away) the Template.
8. Twist the Stand clockwise so the screws lock into the keyholes.
OPTIONAL CHARGING STAND AND TABLE MOUNT

- Magnet
- Command Barcode
- "Auto Mode"
- Magnet
- Magnet
- Notch
- Keyholes
A. Attach the Pem cap to your Camera Mount (1/4" - 20 x 3/4” thread) and turn to the right.
B. Attach the Charging Mount to the Pem cap

<th>COMMAND BARCODES</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Mobile Mode - Normal</strong> (default)*</td>
<td></td>
</tr>
</tbody>
</table>
Scanning this bar code will enable the scanner to enter mobile mode. It will always be in manual trigger mode even when placed in the stand or cradle.  
*Scanner Factory Reset returns to Mobile Mode. | #FNB 41FBA50000# |
| **Auto Mode (Presentation Mode)** |  
Scanning this bar code will enable the scanner to enter auto mode. When the scanner is in auto mode, it will switch to presentation trigger mode when it detects power on the cradle pins. When the scanner is removed from the cradle it will remain in presentation trigger mode until the users presses the trigger. At that point it will switch to normal manual trigger mode. Auto Mode command barcode is also printed on the product label. | #FNB 41FBA50003# |
# Auto Mode (In the Stand)

<td>Green Light blinks (while scanning)</td>
<td>Vibrate when Data successfully scanned</td>
<td></td>
</tr>
</tbody>
</table>

Presentation Mode: Bar Codes placed in the Scanner’s field of view are automatically scanned. Mobile Mode: Pressing the Trigger button initiates a scan.
1. Pair and connect the 7Qi/7Xi to your device prior to placing the scanner in Auto Mode. The Scanner is not discoverable when in Auto Mode and in the Stand. This facilitates a fast connection to the current connected device when powered on (for example the start of the new business day).

2. The Trigger button must be pressed to disable Presentation Mode (and enable Mobile Mode) after the scanner is removed from the Stand.

3. The Scanner will not turn off when its in Presentation Mode and in the Stand under AC Power.

4. To avoid excessive power drain, the scanner should not be left out of the Stand in Auto Mode. Either press the Trigger button or Power off the scanner.

CE MARKING AND EUROPEAN UNION COMPLIANCE
The unit under test was found compliant with all the applicable Directives, 2004/108/EC and 2006/95/EC.

WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT
The WEEE directive places an obligation on all EU-based manufacturers and importers to take-back electronic products at the end of their useful life.

ROHS STATEMENT OF COMPLIANCE
This product is compliant to Directive 2011/65/EU.

NON-MODIFICATION STATEMENT
Changes or modifications not expressly approved by the party responsible for compliance.
